

"Elevate Your Career with" Industry Connect Internship

Opportunities For All Technology and non-Technology students

Eligible students can continue working on real industry problem, in semester 7 & 8 and qualify to earn ₹9000/month apprenticeship, in 8th Sem or after graduation under NATS.

Key Value Proposition

Blended Learning with Real-World Relevance

Building critical thinking and domain-specific application skills aligned with current trends like AI and Blockchain. It aligns class room learning with on-ground industry experience.

Personalized Skill Mapping and Career Insights

Through Skill Aptitude and SWOT Analysis, students develop a personality radar chart to identify strengths, and areas for growth. This personalized self-awareness model empowers them to make informed career decisions.

Innovation-Driven Industry Connect Activities (ICA)

Spot, capture, and validate real industry problems through guided visits—kickstarting critical thinking, problem-solving, and experiential learning journeys.

Why Choose Us

Real Industry Exposure:

Visit industries, identify challenges, and understand real business environments.

Problem-Solving Kickstart:

Begin mapping problems that you'll solve through 7th/8th semester projects.

Guided Proposal Support:

We help structure and validate your project proposal with mentors in semester 7. (For best performing candidates)

Experiential Learning Edge:

Hands-on tasks and field learning sharpen thinking beyond classroom theories.

Career-Aligned Mentorship:

Get direction from experts to align with future internships and job roles.
